Reusability and Cost-effectiveness Ladder Frame for Optimal Performance

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: Bythai
- Model Number: BT04

Product Specification

- Durability: High
- Safety: High
- Stability: High
- Load Capacity: High
- Surface Treatment: Powder Coating
- Color: Steel, Painted Color
- Reusability: Yes
- Size: Customized

Product Description

Product Description:

Frame System Scaffolding is a ladder frame system structuring that is designed for optimal safety and high load capacity. It is a frame scaffolding system that is made of steel material for superior strength and durability, while being lightweight for easy installation. It is built to withstand heavy loads and is equipped with safety features for peace of mind. The frame scaffolding system is also designed with an easy installation process, which reduces the time and labor needed to set it up. With its high load capacity, safety features, and lightweight steel construction, Frame System Scaffolding is the perfect choice for any project.

Features:

Scaffolding Frame System: Frame System Scaffolding is designed to provide a strong, durable and safe scaffolding structure.
Size: Frame System Scaffolding is customizable to any size.
Durability: Frame System Scaffolding is designed with high durability.
Easy Dismantling: Frame System Scaffolding is designed for easy dismantling.
Color: Frame System Scaffolding is available in steel and painted colors.
Safety: Frame System Scaffolding provides a high level of safety.

Technical Parameters:

Parameter	Value
Scaffold System	Frame System Scaffolding
Cost-effectiveness	Yes
Material	Steel
Flexibility	High
Weight	Lightweight
Reusability	Yes
Durability	High
Size	Customized
Easy Dismantling	Yes
Stability	High
Easy Installation	Yes

Applications:

Bythai frame scaffolding system, BT04, is a cost-effective and reliable scaffolding system with high stability and durability. It is made of lightweight steel and painted in various colors. This frame scaffolding system is ideal for both indoor and outdoor uses. It is perfect for various applications, such as building construction, bridge construction, and other scaffolding works. It is easy to assemble and disassemble, and can be used in a variety of environments. The ladder frame is designed for maximum safety and stability, and it can be used on uneven terrains. With its high stability and durability, the frame scaffolding system is an ideal choice for any construction need.

Customization:

Bythai BT04 Frame System Scaffolding
This new Bythai BT04 Frame System Scaffolding is the perfect choice for any construction or home renovation project. Featuring a sturdy ladder frame and a mobile scaffold, this scaffold system has been designed to withstand heavy load capacity with its durable powder coating, while providing easy installation and a range of steel and painted colors to choose from. It is sure to meet your needs for any project, no matter how big or small.
Key Features:
Brand Name: Bythai
Model Number: BT04
Place of Origin: China
