Product Description

Product Description:

Scaffolding ladders are designed to provide safe access for construction workers and other professionals who need to reach higher heights. Made of quality aluminum or hot-dip galvanized steel, our ladders are lightweight yet highly durable, with a 150kg load-bearing capacity that can carry even the heaviest of materials. The 3m ladders have a 50cm wide step, making them ideal for even the most challenging construction projects. Available in silver, these ladders are an essential part of any professional's toolkit and a reliable choice for those working in construction or any other industry where access to higher levels is required. Whether you need a load-bearing ladder for a short-term build or a durable aluminum ladder for a long-term project, our scaffolding ladders are the perfect solution.
