

6.4kg/M Building Scaffolding Pipes For Exceptional Strength

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Thickness: 3.2mm
- Elongation: >20%
- Length: 6m
- Standard: EN39
- Tensile Strength: 420N/mm2
- Weight: 6.4kg/m
- Name: Galvanised Scaffold Tube
- Application: Scaffolding
- Highlight: **6.4kg/M Building Scaffolding Pipes,
Galvanised Building Scaffolding Pipes,
EN39 Scaffold Tube**

Product Description

Product Description:

Our **Galvanised Scaffold Tube** is a hot dip galvanized scaffolding steel tube which is a type of GI pipe. It is suitable for construction, engineering, manufacturing and other applications. It is manufactured according to the EN39 standard and has a thickness of 3.2mm, with a yield strength of 245N/mm². The surface treatment is hot dip galvanized, making it highly resistant to weather and corrosion. It is perfect for any outdoor use due to its strong, durable and reliable performance. Our galvanised scaffold tube is a great choice for your construction and engineering needs.

Features:

Product Name: Galvanised Scaffold Tube
Length: 6m
Tensile Strength: 420N/mm²
Application: Scaffolding
Standard: EN39
Diameter: 48.3mm
Building Scaffolding Pipes
Scaffolding Steel Tube
STK 500 Pipes

Technical Parameters:

Name	Galvanised Scaffold Tube
Material	Galvanised Steel
Thickness	3.2mm
Diameter	48.3mm
Length	6m
Tensile Strength	420N/mm ²
Elongation	>20%
Application	Scaffolding
Standard	EN39
Surface Treatment	Galvanised

Applications:

Bythai Scaffolding's galvanised scaffold tube (Model Number: BT01) is a hot dip galvanized scaffolding steel tube that is certified by SGS and is available at a competitive price of \$5-\$18 per bundle. This steel tube has a bending radius greater than 2.5D and is 3.2mm in thickness. It meets the standards of EN39 and is 6m in length. This product is ideal for use in tube and coupler scaffolding and is an excellent choice for galvanized scaffolding steel tube, scaffolding tubes galvanized, galvanized scaffolding steel tube and galvanized steel scaffolding tube applications. Bythai Scaffolding is able to provide up to 1000tons of this product every month and offers delivery times of 7-15 days. Payment terms include TT/LC.

Support and Services:

Technical Support and Service for Galvanised Scaffold Tube

At XYZ, we provide technical support and service for our galvanised scaffold tube products. Our technical staff are experienced in scaffolding operations and can provide assistance and advice in all aspects of installation and usage.

We provide a comprehensive range of after-sales services, including a 24-hour telephone helpline, on-site visits and a dedicated team of engineers to provide technical advice and assistance.

We also offer a range of training courses, including basic scaffolding operations and safety awareness, as well as more advanced courses such as specialist welding and inspection techniques.

We are committed to providing our customers with the highest level of technical support and service.

Packing and Shipping:

Galvanised Scaffold Tube is typically packaged in bundles or single lengths for shipping. Bundles are wrapped in plastic and secured with metal bands. Single lengths are typically wrapped in plastic. Packaged Galvanised Scaffold Tube is then loaded onto a truck or other shipping vessel for delivery. Delivery times will depend on the location of the shipment and the shipping method used.
