

EN74-1 Standard Coupler Scaffolding With Galvanized Surface Treatment

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Model Number: BM201
- Minimum Order Quantity: 1000
- Price: 4.5
- Delivery Time: 15-25

Product Specification

- Color: Silver
- MOQ: 1000
- Surface Treatment: Galvanized
- Name: Scaffolding Coupler
- Material: Steel
- Type: Right Angle
- Application: Construction
- Standard: EN74-1
- Highlight: Galvanized Steel Drop Forged Couplers, Galvanized Steel Scaffolding Coupler, EN74-1 Standard Coupler Scaffolding

Product Description

Product Description:

Scaffolding Coupler

Using manual scaffold connection tools, such as scaffolding coupler and plank coupler scaffold rotary clamp, is an essential part of construction projects. Our scaffolding coupler is designed to provide a strong and reliable connection between scaffolding tubes and clamps, making sure that the scaffold is structurally sound and safe to use. Our scaffolding coupler meets the EN74-1 standard and is made of high-strength steel to ensure its maximum durability. The coupler is also designed to be compact and lightweight, making it easy to use in any construction project. We offer our scaffolding coupler in a variety of packages, with a minimum order of 1000 pieces. Our coupler is easy to install and provides a secure connection, making it the perfect choice for any construction project.

Features:

Product Name: **Scaffolding Coupler**

Color: **Silver**

Surface Treatment: **Galvanized**

MOQ: **1000**

Package: **Container**

Feature: **High Strength**

Special Design: **Japanese Scaffold Clamps, coupler scaffolding, Steel pipe coupler**

Technical Parameters:

Property	Value
MOQ	1000
Type	Right Angle
Feature	High Strength
Surface Treatment	Galvanized
Name	Scaffolding Coupler
Standard	EN74-1
Color	Silver
Package	Container
Material	Steel
Application	Construction
Special Features	Manual Scaffold Connection Tools, Japanese-style Scaffold Connectors, Japanese Scaffold Connection Fixtures

Applications:

Scaffolding Coupler

The **Scaffolding Coupler**, also known as a Scaffold clamp, Plank coupler or scaffold rotary clamp, is a manual scaffold connection tool, designed to help with the assembly and disassembly of scaffolding structures. It is made from high-strength steel and features a galvanized surface treatment for improved durability and corrosion resistance. The model number is **BM201**. This product is supplied by China Tianjin, with a minimum order quantity of **1000**. The price is **4.5** and the delivery time is **15-25** days.

The Scaffolding Coupler is perfect for any construction or engineering project, as it provides a secure and reliable connection with scaffolding structures. It is easy to use and can be quickly set up and taken down. It is an essential component of any scaffolding system, as it helps with the assembly and disassembly of the scaffolding structures.

Customization:

Customized Service of Japanese-style Scaffold Connectors (Scaffolding Coupler)

Our Scaffolding Coupler product is a high-end Japanese-style Scaffold Connectors with high strength and durability. It is the perfect choice for manual scaffold connection tools.
