

Galvanized Scaffolding Coupler For Construction With EN74-1 Standard

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: china tianjin
- Brand Name: scaffolding coupler
- Certification: SGS
- Model Number: BM201
- Price: 4.5-8.5
- Packaging Details: In bundles
- Delivery Time: 15-25
- Payment Terms: TT/TC

Product Specification

- MOQ: 1000
- Application: Construction
- Name: Scaffolding Coupler
- Feature: High Strength
- Color: Silver
- Material: Steel
- Standard: EN74-1
- Surface Treatment: Galvanized
- Highlight: **SGS Galvanized Scaffolding Coupler, Construction Galvanized Scaffolding Coupler**

Product Description

Product Description:

Scaffolding Coupler - High Quality Scaffold Accessory

Scaffolding Coupler, also known as scaffold clamp, is an essential component in scaffolding projects. It is used to connect two scaffolding tubes together, providing a secure and stable structure for workers to perform construction tasks at elevated heights.

Made from high quality steel, our Scaffolding Coupler is designed to withstand heavy loads and provide maximum safety for workers. It is a standard EN74-1 British scaffold tube clamp, ensuring its compatibility with other scaffolding components and meeting the highest safety standards.

One of the key features of Scaffolding Coupler is its surface treatment - galvanization. This process adds a protective zinc coating to the steel, making it resistant to corrosion and extending its lifespan. This is especially important in construction sites, where scaffolding is exposed to harsh weather conditions.

With its high strength and durability, Scaffolding Coupler is suitable for various types of scaffolding projects, including residential, commercial, and industrial construction. It is an essential scaffold accessory for building facades, bridges, towers, and other structures.

Here are some key benefits of using our Scaffolding Coupler:

Provides a secure and stable connection between two scaffolding tubes

High strength and durability to withstand heavy loads

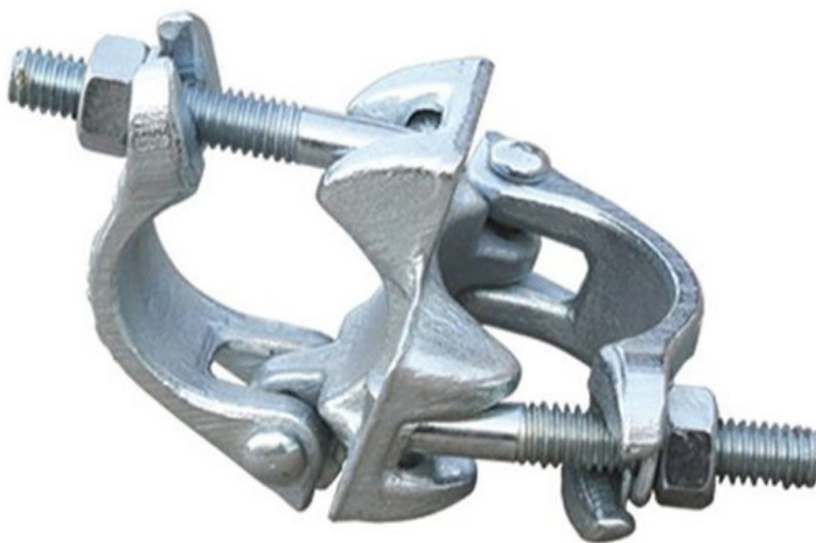

Galvanized surface treatment for corrosion resistance

Standard EN74-1 British scaffold tube clamp for compatibility with other components

Easy to use and install

Cost-effective solution for scaffolding projects

In summary, Scaffolding Coupler is a high quality scaffold accessory that meets the highest safety standards. Its galvanized surface treatment, high strength, and compatibility with other scaffolding components make it an essential tool for any scaffolding project. Trust our Scaffolding Coupler to provide a safe and reliable support system for your construction tasks.

Technical Parameters:

Feature	High Strength
Name	Scaffolding Coupler
Package	Container

Material	Steel
Surface Treatment	Galvanized
Color	Silver
Standard	EN74-1
MOQ	1000
Application	Construction
British Coupler Manufacturers	Yes
Universal Scaffold Clamping Tools	Yes
Japanese Steel Pipe Connectors	Yes
Easy Installation	Yes

Applications:

Scaffolding Coupler - BM201

Introduction

Scaffolding Coupler, also known as Scaffold Clamping System, is a vital component in the construction industry. It is used to connect scaffolding and structure connectors together, providing a strong and stable support for workers to carry out their tasks efficiently and safely.

Product Attributes

Brand Name: Scaffolding Coupler

Model Number: BM201

Place of Origin: China Tianjin

Certification: SGS

Price: \$4.5-8.5

Packaging Details: In bundles

Delivery Time: 15-25 days

Payment Terms: TT/TC

MOQ: 1000 pieces

Color: Silver

Application: Construction

Feature: High Strength

Standard: EN74-1

Product Application

Scaffolding Coupler is widely used in the construction industry for various applications such as:

Building construction and renovation

Bridge construction and maintenance

High-rise building maintenance

Tunnel construction

Roofing and scaffolding for events

And many more

Product Features

Some of the key features of Scaffolding Coupler are:

High Strength: Made of durable materials, our couplers can withstand heavy loads and provide a strong and stable support for workers.

Easy Installation: The couplers are designed for easy and quick installation, saving time and effort for workers on the construction site.

Flexibility: Our couplers can be used with different types of scaffolding and structure connectors, providing flexibility in construction projects.

Durability: With proper care and maintenance, our couplers can last for a long time, making it a cost-effective choice for construction companies.

Safety: Our couplers are designed and tested to meet international safety standards, ensuring the safety of workers on the construction site.

Efficiency: By providing a stable and secure connection, our couplers help to improve the efficiency of construction projects.

Conclusion

Scaffolding Coupler is an essential product in the construction industry, providing a strong and stable support for workers. With its high strength, flexibility, durability, and safety features, it is a must-have for any construction project. Choose Scaffolding Coupler, choose safety, stability, and efficiency for your construction project.

Customization:

Customized Service for Scaffolding Coupler

Brand Name: Scaffolding Coupler

Model Number: BM201

Place of Origin: China Tianjin

Certification: SGS

Price: 4.5-8.5

Packaging Details: In bundles

Delivery Time: 15-25 days

Payment Terms: TT/TC

Package: Container

MOQ: 1000 pieces

Color: Silver

Material: Steel

Feature: High Strength

Key words: Japanese Steel Pipe Connectors, Scaffold Beam Connectors, British Scaffold Tube Clamps

Packing and Shipping:

Packaging and Shipping for Scaffolding Coupler

Our Scaffolding Coupler is carefully packaged to ensure its safe delivery to your location. It is shipped in sturdy cardboard boxes, with each coupler individually wrapped in bubble wrap for extra protection.

Depending on the quantity ordered, our couplers may be shipped in either small or large boxes. Each box is clearly labeled with the product name, quantity, and any special handling instructions.

To ensure timely delivery, we work with trusted shipping partners and offer various shipping options to suit your needs. We also provide tracking information so you can keep an eye on your order's progress.

We take great care in packaging our Scaffolding Coupler, but in the rare case that there is any damage during shipping, please contact us immediately so we can resolve the issue.

Thank you for choosing our Scaffolding Coupler. We are confident that it will meet your expectations and arrive in perfect condition.
