

6.4kg/M Galvanised Scaffold Tube Durable And Lightweight For Scaffolding

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS
- Model Number: BT01
- Price: \$5-\$18
- Packaging Details: In bundles
- Delivery Time: 7-15 days
- Payment Terms: TT/LC
- Supply Ability: 1000tons per month

Product Specification

- Standard: EN39
- Diameter: 48.3mm
- Name: Galvanised Scaffold Tube
- Weight: 6.4kg/m
- Application: Scaffolding
- Yield Strength: 245N/mm²
- Tensile Strength: 420N/mm²
- Thickness: 3.2mm
- Highlight: **6.4kg/M Galvanised Scaffold Tube,
Lightweight Galvanised Scaffolding Tube,
Customized Galvanised Scaffold Tube**

6.4kg/M Galvanised Scaffold Tube Durable And Lightweight For Scaffolding

Product Description:

Product Overview: Galvanised Scaffold Tube

The Galvanised Scaffold Tube is an essential component for constructing durable and reliable scaffolding structures. Made from high-quality steel and pipe, this scaffold aluminum tube offers excellent strength and durability for various construction projects.

Designed to meet the EN39 standard, this galvanised scaffold tube has a thickness of 3.2mm, making it a robust and sturdy option for supporting heavy loads. With a tensile strength of 420N/mm², it can withstand the weight and pressure of construction materials and equipment without bending or breaking.

The surface treatment of this galvanised scaffold tube is essential for its longevity and resistance to corrosion. The tube is coated with a layer of zinc, making it highly resistant to rust and other environmental factors. This galvanised treatment not only enhances the tube's durability but also provides a smooth and polished finish.

In addition to its strength and surface treatment, this galvanised scaffold tube also has a yield strength of 245N/mm². This means that it can handle significant amounts of stress and pressure without permanent deformation, ensuring the safety and stability of the scaffolding structure.

Whether it's for commercial or residential construction projects, the Galvanised Scaffold Tube is an ideal choice for its superior strength, durability, and corrosion resistance. It is a reliable and cost-effective solution for scaffolding needs, providing a secure and stable platform for workers to carry out their tasks.

Technical Parameters:

Attribute	Value
Application	Scaffolding
Name	Galvanised Scaffold Tube

Material	Galvanised Steel
Standard	EN39
Diameter	48.3mm
Thickness	3.2mm
Tensile Strength	420N/mm2
Yield Strength	245N/mm2
Weight	6.4kg/m
Surface Treatment	Galvanised
Keywords	Galvanised Scaffold Tube, Galvanised Steel, EN39, 48.3mm, 3.2mm, 420N/mm2, 245N/mm2, 6.4kg/m, Galvanised

Applications:

Galvanised Scaffold Tube

Product Attributes:

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China

Certification: SGS

Price: \$5-\$18

Packaging Details: In bundles

Delivery Time: 7-15 days

Payment Terms: TT/LC

Supply Ability: 1000tons per month

The Galvanised Scaffold Tube, also known as the scaffolding steel tube or galvanized pipe, is a must-have construction material for building and support structures. Made of high-quality galvanized steel, this scaffolding tube offers unparalleled safety, stability, and durability.

With its versatile application, the Galvanised Scaffold Tube is widely used in various construction projects, including residential, commercial, and industrial buildings. It is the go-to choice for contractors and builders due to its cost-effectiveness and ease of installation.

One of the key features of the Galvanised Scaffold Tube is its corrosion resistance. The galvanization process involves coating the steel with a layer of zinc, which protects it from rust and corrosion. This makes the tube suitable for both indoor and outdoor use, even in harsh weather conditions.

The Galvanised Scaffold Tube also boasts a high load capacity, making it suitable for heavy-duty construction projects. It can support workers, materials, and equipment, providing a safe and secure working platform.

Whether you are working on a small home renovation or a large-scale construction project, the Galvanised Scaffold Tube is an essential tool for ensuring the safety and stability of your building. Trust Bythai Scaffolding's Galvanised Scaffold Tube for all your construction needs.

Customization:

Galvanised Scaffold Tube Customization Service

Brand Name: Bythai Scaffolding

Model Number: BT01

Place of Origin: China

Certification: SGS

Price: \$5-\$18

Packaging Details: In bundles

Delivery Time: 7-15 days

Payment Terms: TT/LC

Supply Ability: 1000tons per month

Surface Treatment: Galvanised

Material: Galvanised Steel

Application: Scaffolding

Standard: EN39

Weight: 6.4kg/m

Key Features:

Hot dip galvanized scaffolding steel tube

Scaffold aluminum tube

Scaffolding steel tube price

Robust and durable construction

Compliant with EN39 standard

High corrosion resistance

Cost-effective pricing

Easy to install and dismantle

Packing and Shipping:

Product Name: Galvanised Scaffold Tube

Packaging and Shipping:

The Galvanised Scaffold Tube is carefully packaged to ensure safe and secure delivery to our customers. Each tube is individually wrapped in protective material and then placed in a strong cardboard box. The box is sealed with tape to prevent any damage during transportation.

For larger orders, the tubes are stacked and secured on a wooden pallet to prevent any movement during transit. The pallet is then wrapped with stretch film for additional protection.

Our shipping method varies depending on the size and weight of the order. We use reliable and trusted carriers to ensure timely delivery to our customers. In some cases, we may also offer expedited shipping options for urgent orders.

Once the order is shipped, the customer will receive a tracking number to monitor the status of their delivery. We take great care in packaging and shipping our Galvanised Scaffold Tubes to ensure they arrive in perfect condition.
