Product Description

Product Description:

One of the key features of the Ringlock System Scaffolding is its hot-dip galvanized surface treatment. This treatment provides a layer of corrosion protection that helps to prevent rust and other forms of damage, ensuring that the scaffolding system stays in top condition for years to come. This makes it an ideal choice for outdoor construction projects that are exposed to the elements.
The Ringlock System Scaffolding is designed to be easy to assemble and disassemble, making it a highly convenient solution for construction workers. The system features a unique locking mechanism that allows for quick and secure connections between the various components, ensuring that the scaffolding is stable and safe to work on.
This ringlock scaffolding product is manufactured in Tianjin, China, by a team of experienced and skilled professionals. The product is made to meet the highest standards of quality and durability, ensuring that it will perform reliably under even the most demanding conditions. As such, it comes with a two-year warranty that covers any defects in materials or workmanship.
When you purchase the Ringlock System Scaffolding, you can rest assured that you are getting a high-quality product that is designed to meet your construction needs. The product is shipped from China, ensuring that you receive it quickly and efficiently.
Overall, the Ringlock System Scaffolding is a reliable and versatile scaffold coupler system that is perfect for any building application. With its hot-dip galvanized surface treatment, easy assembly, and durable construction, it is sure to meet all your construction needs. Order yours today and see the difference it can make on your next construction project!

Technical Parameters:

Design Style	Industrial
Shipping origin	China
Place of Origin	Tianjin China
Material	Q235 Steel
Application	Building
Product Name	Ringlock System
Application Scenarios	Architecture
Surface Treatment	Hot-dip Galvanized (hot dip galvanized ringlock)
Warranty	2 Years
Special Features	Advanced Ringlock Technology, Scaffolding Ring Lock

Applications:

The Ringlock System Scaffold's unique design allows for easy assembly and disassembly, making it ideal for both temporary and permanent structures. Its ring lock type scaffold allows for secure and stable support, ensuring worker safety while working at heights.
With SGS ISO certification and a minimum order quantity of 1000, the Bythai Ringlock System Scaffold is a reliable and high-quality product that meets industry standards. The price range of $10.8 to $85.5 makes it a cost-effective choice for building projects of all sizes.
In bundles packaging details and a delivery time of 10-15 days from our shipping origin in China ensure that your Ringlock System Scaffold arrives in a timely and organized manner. Payment terms of TT/TC make it easy to purchase this product.
When it comes to application, the Bythai Ringlock System Scaffold is suitable for a wide range of building projects. Whether you're constructing a new building, performing maintenance on an existing structure, or working on a temporary stage or platform, this product is the perfect choice.
In summary, the Bythai Ringlock System Scaffold, model number BT203, is a high-quality and cost-effective solution for any building or construction project. Its innovative Ring Lock Design, versatile application, and reliable support make it a must-have for any construction site.

Packing and Shipping:

The Ringlock System Scaffolding product will be carefully packaged to ensure it arrives at your doorstep in pristine condition. Each component will be securely wrapped and placed in a sturdy cardboard box. The boxes will then be stacked and wrapped with plastic wrap to prevent shifting during shipping.
Shipping will be handled by our trusted carrier partners and will be delivered to your specified address within the estimated delivery time. Please note that additional shipping fees may apply for international orders.
