Product Description

Product Description:

Our steel plank ringlock is customizable to meet your specific needs. You can choose the length that suits your scaffolding requirements. These planks are shipped directly from our manufacturing facility in China to ensure that you get the best quality products at an affordable price.
We understand the importance of safety when working on scaffolding structures, and that is why we ensure that all our steel planks are made to comply with industry standards. You can trust our steel plank with hook to provide you with a safe and secure working platform.
Our galvanized steel plank is coated with a layer of zinc, making it resistant to corrosion, rust, and other environmental factors. This ensures that your scaffolding planks last longer and provide you with the best value for your money.
We package our steel plank ringlock in containers to ensure that they arrive at your job site in optimal condition. Our packaging is designed to protect your planks from damage during transit, ensuring that they are ready to use as soon as they arrive.
Our steel planks are made of high-quality steel material, making them lighter and easier to handle than traditional wooden planks. This reduces the risk of injury and ensures that you can work more efficiently and effectively.
Whether you are working on a small or large scaffolding project, our steel plank with hook is the perfect choice for your needs. It is durable, reliable, and customizable to meet the specific requirements of your project.
Order your galvanized steel plank today and experience the difference in quality and reliability that our products offer.

Features:

Product Name: Scaffolding Plank
Place of shipment: China
Length: Customized
Material: Steel
Packaging: Container
Surface: Pre-galvanized/hot Dip Galvanized/Spray Plastic
Features:
Steel plank with hooks for easy installation and removal
Pierced steel planking for increased slip resistance
Designed as a steel plank for scaffold applications

Technical Parameters:

Packaging	Container
Surface	Pre-galvanized/hot Dip Galvanized/Spray Plastic
Length	Customized
Usage	Scaffolding
Material	Steel
Place of shipment	China

Steel plank with hooks, steel catwalk scaffold, galvanized steel planks, and scaffolding steel plank are all available options for this product.

Applications:

The Bythai BT205 Scaffolding Plank is perfect for a wide range of applications. It can be used as a steel catwalk scaffold, providing a safe and sturdy platform for workers to walk on. The steel planks w/hook are also ideal for use as a workbench, providing a stable surface for workers to carry out their tasks. It can be customized in length to fit any specific requirements of a project.
The Bythai BT205 Scaffolding Plank is certified with SGS and ISO, ensuring that it meets the highest standards of quality and safety. It has a minimum order quantity of 1000 pieces and a price range of 15.5-85.5, making it an affordable yet reliable product for any construction project. It is packaged in bundles and shipped in containers, ensuring its safety during transportation.
The Bythai BT205 Scaffolding Plank is perfect for use in a variety of scenarios. It can be used in large construction sites, such as building skyscrapers or bridges, as well as smaller projects, such as residential homes or commercial buildings. It is also ideal for use in industrial settings, such as factories or warehouses, where workers need a safe and secure platform to work on.
The Bythai BT205 Scaffolding Plank is made of steel, making it strong and durable. Its design ensures that it can withstand heavy loads, making it a reliable product for any construction project. It can be used in a variety of weather conditions, making it versatile and adaptable to any working environment.
The Bythai BT205 Scaffolding Plank is shipped from China, ensuring its quality and authenticity. It has a delivery time of 10-15 days and can be paid for using container or shipping payment terms. Its versatility and reliability make it an ideal product for any construction project.
In summary, the Bythai BT205 Scaffolding Plank is a reliable and versatile product that is perfect for any construction project. Its steel plank with hooks and steel plank 230 design makes it a safe and secure platform for workers to use. Its certification with SGS and ISO ensures that it meets the highest standards of quality and safety. Its affordability and reliability make it an ideal product for any construction project, big or small.
