

42.4x48.3mm Galvanised Scaffold Tube with 3.2mm Strong Tensile / Yield Strength

Our Product Introduction

for more products please visit us on bythaiscaffold.com

Basic Information

- Place of Origin: China
- Brand Name: Bythai Scaffolding
- Certification: SGS ISO
- Model Number: BT201
- Minimum Order Quantity: 1000
- Price: \$10-\$85
- Packaging Details: In bundles
- Delivery Time: 10-15 days
- Payment Terms: TT/TC
- Supply Ability: 1000tons per month

Product Specification

- Thickness: 3.2mm
- Tensile Strength: 420N/mm²
- Name: Galvanised Scaffold Tube
- Application: Scaffolding
- Diameter: 48.3mm
- Surface Treatment: Galvanised
- Material: Galvanised Steel
- Yield Strength: 245N/mm²
- Highlight: 3.2mm Galvanised Scaffold Tube,
48.3mm Galvanised Scaffold Tube,
42.4x48.3mm Galvanised Scaffold Tube

Product Description

Product Description:

The Galvanised Scaffold Tube is treated with a galvanised surface treatment, which helps to protect it from rust and corrosion. This treatment also gives the tube a shiny, polished finish, making it aesthetically pleasing. The galvanised surface treatment ensures that the tube has a longer lifespan and is more resistant to wear and tear.

The Galvanised Scaffold Tube conforms to the EN39 standard, which ensures that it meets the required safety and quality standards. This means that you can trust that the tube is safe and reliable to use in construction projects.

The Galvanised Scaffold Tube has a thickness of 3.2mm and a weight of 6.4kg/m. This makes it a strong and sturdy option for use in scaffolding applications. The tube has a yield strength of 245N/mm², which means that it can withstand heavy loads without bending or breaking.

The Galvanised Scaffold Tube is a popular choice for use in construction projects due to its durability, strength, and resistance to rust and corrosion. It is commonly used in conjunction with other scaffolding components, such as couplers and boards, to create a safe and stable working platform for workers.

If you're looking for a high-quality bs1139 scaffolding tube, the Galvanised Scaffold Tube is an excellent option. Its galvanised surface treatment, EN39 standard, and strong, sturdy construction make it a reliable choice for any construction project. Order yours today and experience the benefits of using high-quality metal tubing in your scaffolding system.

Features:

Product Name: Galvanised Scaffold Tube

Surface Treatment: Galvanised

Standard: EN39

Weight: 6.4kg/m

Thickness: 3.2mm

Tensile Strength: 420N/mm²

This galvanised scaffold tube is a durable and sturdy option for any scaffolding project. With a weight of 6.4kg/m and a thickness of 3.2mm, this galvanized pipe meets the EN39 standard and has a tensile strength of 420N/mm². Whether you're constructing a temporary structure or building something more permanent, this scaffold aluminum tube is a reliable choice.

Technical Parameters:

Attribute	Value
Name	Galvanised Scaffold Tube
Material	Galvanised Steel
Diameter	48.3mm
Thickness	3.2mm
Weight	6.4kg/m
Yield Strength	245N/mm ²
Tensile Strength	420N/mm ²
Standard	EN39
Surface Treatment	Galvanised
Application	Scaffolding

Applications:

This scaffolding tube price varies from \$10 to \$85, depending on the quantity ordered and the delivery location. The minimum order quantity for this product is 1000 pieces, with a supply ability of 1000 tons per month. It takes around 10-15 days to deliver the products, and the payment terms are TT/TC.

With a tensile strength of 420N/mm², these steel tubes are perfect for heavy-duty applications. It has a weight of 6.4kg/m and meets the EN39 standard, ensuring high-quality and safety. The product is certified by SGS ISO, ensuring that it meets the required quality standards.

These galvanised scaffold tubes are typically used for construction, maintenance, and repair work. They provide a safe and stable platform for workers to carry out their jobs effectively. With their high-quality material and sturdy construction, these steel tubes ensure the safety of workers.

The BT201 Galvanised Scaffold Tube comes in bundles, making it easy to transport and store. It is a cost-effective option for those who

need high-quality scaffolding tubes for their projects. Contact us now to place your order and get the best deal on scaffolding tubes!
